

14-18 Great Titchfield Street
London W1W 8BD

Position: Software Tester, Central London.

Salary: £18k to £25k dependent on experience.

Wahanda is a young startup already leading the field in online health and wellness.

We are looking for a software tester to join our experienced (yet young at heart) technology team.

While prior testing experience isn't necessary, we are looking for candidates who should have some knowledge of software testing processes and methodologies, proven communication skills and demonstrable accuracy and attention to detail. Above all else, you must have a real desire to succeed in a software testing role.

The Role

You will be helping with all aspects of the development process from working with developers during the build phase to fielding problems raised by our customers.

Responsibilities will include:

- Poking our numerous websites and internal applications to ensure they meet the quality our customers expect.
- Writing and maintaining our library of manual test scripts.
- Coming up with new and exciting ways to break things.
- Pointing out the numerous flaws in the developer teams' work (nicely).
- Fielding issues from our operations, customer support and merchant support teams.

As a small startup everyone in the tech team takes on a variety of roles as required. There is ample opportunity to get involved in other areas such as systems engineering, site operations and even development.

This is a great opportunity to diversify your skills and work as part of our very experienced team.

Core Skills

- Attention to detail.
- Good general analytical ability.
- Ability to clearly communicate to both a technical and non-technical audience.
- Self-motivated.
- Able to work well under pressure.

Desirable

- Experience with Windows, Linux or Mac administration.
- Automated testing experience (E.g. Selenium)
- Basic database analysis (SQL).
- Prior experience in a software testing role.

Interviews

We will contact you within one week if we would like to invite you to an initial interview at our London office.
